Hannes Kolehmainen, world's champion distance runner, and Abel Kiviat, holder of the world's record for 1,500 meters, were suspended last night by the regis. tration committee of the Metropolitan Association for suspicious circumstances atof the Fourth Company, Thirteenth Regi-ment, on Saturday night.

The time of the race was 19 minutes 5 4-5 seconds, and when the dead heat was announced there loud cries of "fake" and frameup" spectators.

After the race was over the claim was race, and this is borne out by the state-ment of the doctor who had been attend-ing him for several days. Kiviat's friends insisted yesterday that there was nothing wrong with the race except the physical condition of the contestants. It was stated that Kiviat had been under the doctor's care and should not have competed at all. In verification of this THE SUN called up Dr. Lucey of Tompkinsville on the phone and asked him truth about the runner's condition. So far as medical knowledge goes the Answer was a complete allbi for Kiviat. Dr. Lucey said that Kiviat came to him on Tuesday last suffering from coid, bronchitis and an inflamed nose. He treated him at that time and on Thurs-day lanced the nose. That failed to corday lanced the nose. MORE TO BE DONE LATER

The battle ended absolutely as soon as the result of the election was announced and all differences were forgotten at once by the two factions. Crescent men set a precedent some years ago when they entertained the St. Nicholas hockey team after that team had beaten the Crescents for the championship, and that same spirit still maintains in the club. The mem-bers regard the recent election in just the same way as they would a game of tennis, goif or billiards. LEAD FOR KEEL MOULDED.

Great Weight Indicates Cochran Yacht Will Be High Powered.

The lead for the cup defender building cast last Saturday. The mould was moved out to the lead pots early in the morning and the pouring of the moulten lead began. About sixty-two tons were run into the mould and then allowed to cool. The mould was removed yesterday and the casting pronounced a good one. The rough sides will be smoothed off and then the keel plate will be attached by lag screws, and on this plate the frames

will be set up.

The lead has a slot for a centreboard. This is the second of the trio to be built that has a board, and it is expected that the Owen boat building at Bath for the Tri-City syndicate also will have a board.

Monol metal is to be used in plating

Tri-City syndicate also will have a board.

Monol metal is to be used in plating the Gardner boat and the plating will be fastened with monol metal rivets. The particular advantage of this metal is that it makes a very smooth surface and will keep very clean in the water.

The lead is about 22 feet long on the bottom and 33 inches wide at the widest part. The forward end is fined off very much and it tapers off aft to the rudder post. It is about 7 feet high at the forward end. This yacht, it is said, is to have more beam than either of the others and this together with the weight

Designer Nicholson is not tied to any set of rules and he wants the fastest type he can turn out. It is said also that the Shamrock will measure about 110 feet on deck and will spread between 11,000 and 12,000 square feet of canvas. She is to have one tall mast, which will be 150 feet in length. March 1. Some busy person in Los Angeles sent a story broadcast last week that Snod-grass was preparing to jump the Giants because Hempstead would not grant his salary demands. "I have no official information that any of our players has signed or intends to sign with the Federal League. If Fromme had signed with the Feds it seems reasonable to suppose that he would have written or telegraphed to the New York club before making such a move. The fact that I haven't heard a word from him directly or indirectly since the close of the season would seem to indicate that Fromme hasn't made a move one way or
